JAYA SAI PUJARI

Backend & AI Systems Engineer | Bangalore, India
+91 9381453961 | pujarijayasai@gmail.com | linkedin.com/in/pujarijayasai

PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA: 8.66) with strong foundations in data structures, algorithms, and distributed systems. Experienced in backend development using Java, Python, Node.js, and REST APIs. Built scalable applications spanning blockchain, AI-driven health systems, and embedded robotics. Passionate about reliability, performance, and clean software design.

SKILLS & TOOLS

Languages	Java, C++, C, Python
Backend & Web	Flask, Spring Boot, Node.js, REST APIs, HTML, CSS, JavaScript
Machine Learning	Scikit-learn, PyTorch, Pandas, Feature Engineering, Model Evaluation
Databases	MongoDB, MySQL, Firebase
DevOps & Tools	Git, Linux CLI, Docker, Kubernetes (basics), GCC, GDB
Core CS	Data Structures & Algorithms, OOP, OS, DBMS, Computer Networks

PROJECTS

AI Health Intake & Symptom Screener *React · Spring Boot · Docker · Claude API*

- Built AI-powered web app analyzing patient symptoms and predicting probable health conditions in real time
- Integrated Claude API for diagnosis inference; designed REST endpoints with Spring Boot backend
- Containerized with Docker and configured Kubernetes for horizontal scaling under load
- Developed interactive donut chart dashboard visualizing population-level disease trends across 7 conditions

Intrusion Detection System (AI-Based) *Python · Scikit-learn · PyTorch · Pandas*

- Built ML pipeline classifying network traffic as normal or malicious with 98.5% accuracy
- Implemented and benchmarked Random Forest, Neural Networks, and XGBoost; optimized decision thresholds
- Handled imbalanced datasets via SMOTE; evaluated using ROC-AUC, confusion matrix, and precision-recall metrics

Blockchain-Based Food Traceability System *Hyperledger Fabric · Node.js · Docker*

- Developed permissioned blockchain solution for tamper-proof food supply chain tracking across multiple orgs
- Implemented smart contracts (chaincode) recording lifecycle events: harvesting, packaging, transport, delivery
- Built REST APIs for application-blockchain integration; deployed multi-org Fabric network using Docker

Cop Connect – AI-Powered Police Web Platform *Python · Flask · Firebase · OpenAI API*

- Built full-stack platform enabling real-time civilian-police interaction with AI-automated complaint filing
- Integrated OpenAI API for 24/7 user assistance; optimized backend REST endpoints for secure data flow

EDUCATION

MVJ College of Engineering, Bengaluru 2023 – 2027
Bachelor of Engineering – Computer Science & Engineering **CGPA: 8.66 / 10**

ADDITIONAL

Solved DSA challenges on LeetCode & HackerRank · Completed courses in Java, DSA, and Python Automation · Built 4+ end-to-end systems independently · Strong interest in scalable AI systems and backend engineering
